

CLOCK TIMER

PRODUCT DESCRIPTION :

Clock Timers are the timers that have a real time clock in built. Hence, you can set the actual clock time at which you want your load to turn ON and OFF. The daily times have a 4 digit led display that always indicate the current clock time. There will be a battery inside to keep the clock running even in case of a power failure. The daily timers offer a provision to set up-to 8 different ON and OFF timings for the load. The user can choose the number of times it has to be set up. The provision is also given to adjust the system clock. The daily timers are available for all types of motor starters and lighting loads.

APPLICATIONS :

The daily timers find various applications in agriculture and domestic sector.
